

## Department of Toxic Substances Control

### Availability Session

### Study of Airborne Asbestos from Serpentine Gravel Road

### April 28, 2005

The Department of Toxic Substances Control (DTSC) will have staff available to informally meet with you and discuss the recently completed study of airborne asbestos from a serpentine gravel road in Garden Valley. The study concludes that airborne asbestos from vehicle traffic on such roads may pose a health risk and recommends resurfacing of serpentine gravel roads. Staff from the Cal/EPA Office of Environmental Health Hazard Assessment will be available to talk about the risk assessment. Local representatives from El Dorado County will also participate.

**Location: Marshall Grange Hall**  
**4940 Marshall Grade Road**  
**Garden Valley**

**Date: Thursday, April 28, 2005**

**Time: Drop by anytime from 4:00 PM to 9:00 PM**

If you have any questions or have need for reasonable accommodation or accessibility information please contact Nathan Schumacher at (916) 255-3650 or (866) 495-5651.
